<https://apify.com/oneary/weather-database-scraper>

Deliverables

1. Python code with working solution
2. video of it running and placing orders
3. statistical results

Evaluation Criteria

- working functionality
- Code clarity and organization
- using tools with building code agents like cursor.com / Antigravity / Kiro etc.

Extra points for (for example):

- scale!
 - telegram connection
-

Timeline

You will have **5 - 7 days** to complete this task. Please ensure you submit the deliverables by the end of this period.

Submission by email gilad@crowdwisdomtrading.com

Submit the following:

- A link to your GitHub/GitLab repository.
- APIFY tokens used - must!
- A output examples

We look forward to seeing your solution!

Thanks for applying!

Gilad
